DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kahle.

Kahle discloses all of the subject matter as set forth in the claims and is substantially identical to the invention as broadly recited. Some of the claimed elements clearly disclosed by the reference are: a method and system for individually labeling a compact disk at the time digital information is recorded. In regard to claim 9 the examiner submits that Kahle inherently performs statistical comparative analysis in order for his invention to function. Further, Kahle inherently discloses a destructible label.

Response to Arguments

3. Applicant's arguments filed 1/16/02 have been fully considered but they are not persuasive.

In regard to applicants arguments concerning the purpose of the Kahle reference, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987). Further, in response to applicant's arguments regarding the label, the functional recitation that recites that the adhesive

prevents removal of the label without tearing has not been given patentable weight because it is narrative in form. In order to be given patentable weight, a functional recitation must be expressed as a "means" for performing the specified function, as set forth in 35 USC 112, 6th paragraph, and must be supported by a recitation in the claim of sufficient structure to warrant the presence of the functional language. *In re Fuller*, 1929 C.D. 172; 388 O.G. 279.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
